

The fundamental objective of 'Colegio Internacional Costa Adeje' is to provide the highest quality of education from pre-school until 2nd of bachillerato (6th form).

Our aim is to educate pupils to become competent, capable and honest individuals through a personalised education with emphasis on responsibility and effort and taking into consideration the multicultural aspect of our centre.

Based on the Spanish educational system and through the use of the most modern educational methods which enhance the skills of the student as an individual, their creativity, team work and social values are developed.

We offer a comprehensive education paying specific attention to the intellectual, emotional and physical needs of each student.

To achieve this, the guiding principles of our work are:

- To meet the educational requirements of our students, adapting to their abilities and interests, using new technologies and promoting languages.
- To offer guidance and information to families in order to achieve academic success.
- To provide our teachers with the necessary means to perform their educational work in the most effective way.
- To make use of adequate facilities for optimal development of educational, sports and leisure activities.
- To develop new projects in line with a modern educational system which guarantees high achievement.

Our staff are committed to continuous improvement and meeting educational goals whilst considering the needs of both parents and pupils.

The management are committed to supporting and providing the necessary resources to ensure the success of this policy, making the 'Colegio Internacional Costa Adeje' one of the most prominent schools in Tenerife.

We comply with the norm UNE-EN-ISO 9001:2015, the quality control award, as central to the maintenance of educational excellence.

Costa Adeje, 23 July 2016

Signed: The Management
